RESEARCH

My primary interests lie in the field of **natural language processing (NLP)**. My current exploration focuses on the following aspects of **large language models (LLMs)**:

- *Data:* Working on data-driven learning, synthetic data, data generation and data assessment. Data is everywhere in LLMs' pipelines.
- *Evaluation:* Constructing reliable frameworks and datasets to assess LLMs' language generation, contextual understanding, factuality, robustness, among others.
- *Social Implication:* Identifying risks in LLMs such as misinformation and ethical issues, aiming to build NLP systems that reflect human values.

PUBLICATIONS AND MANUSCRIPTS

To date, I have authored **17** research papers, including **10** first/co-first author pieces. Most of my works are accepted to top NLP conferences including ACL/EMNLP. I received an ACL 2024 **Outstanding Paper Award** as the first author.
