Research

My primary interests lie in the field of **natural language processing (NLP)**. My current exploration focuses on the following aspects of **large language models (LLMs)**:

- *Data:* Working on data-driven learning, synthetic data, data generation and data assessment. Data is everywhere in LLMs' pipelines.

- *Evaluation:* Constructing reliable frameworks and datasets to assess LLMs' language generation, contextual understanding, factuality, robustness, among others.

- *Social implication:* Identifying risks in LLMs such as misinformation and ethical issues, aiming to build NLP systems that reflect human values.

I have supervised a total of **10** undergraduate/master's students, many of whom have co-published articles under my mentorship.
